OBJECTIVE: To obtain work as a web developer and grow my own business, Ryan Web Designs. I am also available for freelance or contract work.

CAREER SUMMARY

I enrolled in the Interactive Multimedia/Web Design curriculum at Delaware County Community College when I left CIGNA Corporation in 2006. My work experience at CIGNA Corporation included managing one of their corporate websites. I wanted to stay involved with web design so I went back to school to study the most current web technology. I launched Ryan Web Designs in 2006.

EXPERIENCE

Web Designer

2006 – Current

Ryan Web Designs

Design and develop websites for small businesses.

- Responsible for identifying business needs and web solutions for the client.
- Design and develop logos and banners, page layout, navigation.
- Format and size images, pictures, graphics, architectural floor plans for the web.
- Provide content, external links, contact forms required for the business.
- Secure domain names and hosting for the clients.
- Provide maintenance and updates as needed.

Samples are available at: www.ryanwebdesigns.com.

Web Site Manager

1996-2006

CIGNA Corporation, Philadelphia, Pa.

Initially responsible for the design, content and support of a corporate intranet site for 4,000 managers to access Human Resource and Compensation information for CIGNA's 30,000 employees. I served as the senior team leader for the development and implementation of the original intranet site. Over 10 years the site evolved into one of the most popular web sites in the company. I managed a team of web developers and information analysts during a period of rapidly changing web technology.
